WILL IT BE YOU TO “SING OHIO’S PRAISE?”
The breadth of The Ohio State University college experience is unmistakable on the Lima campus. Education abroad excursions, theatre performances, art gallery exhibitions and first year experience trips provide outstanding cultural opportunities right at our students’ fingertips. Access to intramural sports, engaging on-campus clubs and organizations, outreach opportunities, undergraduate research projects and internships provide students the chance to experience firsthand how unique an Ohio State education can be. The Ohio State University is one of the most comprehensive universities in the U.S. and one of the largest in the world. These distinctions mean having more resources devoted to fueling our students’ next big ideas and maximizing academic potential. At Ohio State Lima, students have endless possibilities where big meets small. Professors know our students’ names and serve as mentors to help guide their academic paths.
First generation college student, **Kayla Brown ’19**, recently graduated with her bachelor’s in business management after attending Ohio State Lima all four years.

**Rudd Scholarship Award Recipient**

**Student Senate Leader**

**Lima Homecoming Queen**
“This campus is more than an institution, it is a second home. Ohio State Lima has presented me with bountiful opportunities, introduced me to some of my closest friends, and fostered some wonderful memories.”

When you attend Ohio State Lima, you’re an Ohio State student all the way. That means all of the university’s vast resources are open to you, including one of the most comprehensive libraries in the world, world-class research facilities, student activities, and other benefits (and yes, that includes tickets to watch your Ohio State Buckeye teams as they compete for national championships). You’ll have the same rich, hands-on academic environment shared by all Ohio State students but with convenient access, smaller classrooms and more opportunities for individual guidance from faculty. With 12 degree programs, you can start HERE at Ohio State Lima and finish HERE with an Ohio State University degree.
At the epicenter of it all sits the new, state-of-the-art Perry Webb Student Life Building. Forming the core of the student life experience and serving as a central gathering place, The Webb provides Ohio State Lima students with a place to study, eat, relax and work collaboratively when they are not in class.

coffee bar • information commons • fitness center • multipurpose lounge spaces • grab-and-go food services
STUDENT GROUPS AND ORGANIZATIONS—ENGAGING IN UNIVERSITY LIFE

Ohio State Lima offers the unique opportunity for all students to become the best versions of themselves. Add to your university experience through the development of interpersonal skills and the expansion of knowledge that will help you prepare to live in a multicultural society and to work in a global community. Join one of the many student groups and organizations at Ohio State Lima that were created by students, for students.

The Webb is a unique space on campus where students undoubtedly feel that unmistakable Buckeye spirit.

For many students, Ohio State is more than a degree; it’s a transformation, a collection of experiences that will enrich both your life and your career.

From academic clubs to social organizations and from veterans events to bonfires, our student life programs ensure a one-of-a-kind experience. For a full list of clubs, organizations, student government and more, visit Lima.OSU.edu/studentlife.
Rachel Crites knew she wanted to work with animals. When she was very young, she visited a cousin at The Ohio State University. A sign for the zoology department started her wheels turning.

Today, Rachel is an evolutionary ecology major. She has taken some classes in Columbus and at Stone Laboratory on Lake Erie, but her academic home is in the biology labs at Ohio State Lima, specifically working with Dr. Ryan Norris and other students doing undergraduate research in his lab.

Because she is a Buckeye, Rachel found an undergraduate research home and is building her future one opportunity after another.

If you could sum up academics at Ohio State Lima in one word, it would be exploration. Research opportunities abound for undergraduates who are ready to explore science and industry challenges outside the classroom. We're proud to tell prospective students about our world-class academic environment — the faculty and facilities, our comprehensive range of majors and our commitment to leading-edge technology and connectivity.

Because of her work with Dr. Norris looking at Praomys rostratus, the West African soft-furred mouse, Rachel earned a spot in Chicago's Field Museum of Natural History Research Experience for Undergraduates program funded by the National Science Foundation.

Ohio State is #12 in the nation for sought-after graduates among job recruiters.

Paige Purdy has purposely chosen internships and co-ops that strengthen the skills she needs to pursue a career as a lawyer – writing, research, reading and interpersonal ability. At Crown Equipment Corporation in New Bremen she creates content for external and internal audiences for a variety of projects through the marketing department.

“This role has put so much of what I learned in school into a real-world perspective,” Purdy said. “My past two co-ops are both helping to uncover what I truly value in organizations I wish to work for in the future and what I am truly passionate about.”

With the dream to work for an insurance company or agency, accounting major Brayden Cox took his first steps towards his goal interning for Purmort Brothers Insurance in Van Wert, quoting personal lines insurance policies, marketing coverages to gain new clients and learning the nuts and bolts of an insurance office: answering phones, filing and processing payments.

“I believe that my internship has enriched my classroom experience in lots of ways. Given that I have experience within the insurance field, it makes me excited for my future, so I work harder on my studies, especially once I get into the insurance classes,” Cox said. “I decided to obtain an internship because it is a very valuable experience when trying to find a job after graduation.”

After a 14-hour plane ride, biology major Baylie Brock was an intern at a hospital in Milan, Italy, spending several days each with a variety of specialists, including neurosurgery, neurology, pediatrics, plastic surgery and ophthalmology.

“My time in Italy definitely helped me narrow down my options. It was really helpful just to focus on that for two weeks without all of the distractions I have here. That’s when I really decided which way I wanted to go.”
BuckeyeThon is the largest student-run philanthropy in the state of Ohio. In 2019, the combined efforts of the Ohio State campuses raised $1,704,184.19 for the kids being treated in the Hematology/Oncology/Bone Marrow Transplant unit at Nationwide Children’s Hospital. Ohio State Lima students formed a team to help the cause.

“For me, it was such a beautiful embodiment of what it means to call yourself a Buckeye. We are the leaders of tomorrow. We are the world changers and the future makers.”
-Kirsten Brunswick, sophomore at Ohio State Lima
