Ohio State Total Health and Wellness is a nurse practitioner-led primary care family practice at Ohio State East Hospital. Our team is now offering telehealth visits for faculty, staff, their dependents and students at the Ohio State Lima campus. **Call 614-685-9994 to schedule an appointment.** With telehealth visits, primarily conducted via video, you can easily receive treatment for many conditions from your Ohio State health care provider remotely.

Instead of coming into the office for your appointment, you can stay home, in your office or anywhere with a Wi-Fi or data connection, and use your smartphone, tablet or computer to see and talk to your provider. During your virtual visit, your provider can perform many of the same tasks for you as they would for an in-person visit, including prescribing medication.
